HG Management

1. Do you need to get IV fluids more often at the ER, clinic or at home?
2. Are you taking your meds on a strict daily schedule?
3. Are your meds staying down or do you need them IV, subcutaneously or sublingual?
4. Does your medication dose need to be increased?
5. Have you received any B vitamins and a multivitamin in your IV fluids?

HG symptoms peak between 8 and 11 weeks of pregnancy.

When will HG end?
